Hi Anne & Mark

Firstly an apology - Mark -when we caught up at NRAS meeting in Feb I said I'd give you feedback ... discussed this with OTC Program Accred Ctee last week then I completely forgot so missed your deadline. (I'm blaming everything on covid at present).

Anyway- my feedback is in support of all of your proposed changes, so nothing profound to add:

- there is clear and well justified rationale for all changes provided in the ADC consultation document
- the inclusion of a criteria re consumer input (and clarification that this includes 'patients') is a relevant and important addition
- the separate standard on cultural safety provides a powerful message about the priority needed for this outcome.

A minor wording suggestion:

1.8 **The program provider** ensures that students understand the legal, ethical and professional responsibilities of a registered dental practitioner.

Hope you are both well,

best wishes

Rebecca
